

GHG- and climate targets

RZ ZamPart will work purposefully and committed in line with current environmental and climate policy. The work will extend to other stakeholders and the goal is to create a sustainable society through responsible action.

RZ ZamPart shall annually calculate its footprint according to the GHG protocol, progress towards the goals will be monitored and action plans for success shall be in writing. The goals are:

- RZ ZamPart has reduced its SCOPE 1 emissions by more than 95%* by 2023 and will continue to maintain emissions at that level.
- RZ ZamPart has reduced its SCOPE 2 emissions by more than 95%* by 2023 and will continue to maintain emissions at that level.
- RZ ZamPart will reduce its SCOPE 3 emissions by more than 50%* by 2030. Joining SBTi and active action plans for the years 2026-2030 will ensure this.
- RZ ZamPart will reduce its SCOPE 3 emissions by more than 90%* by 2045.
- The remaining parts to reach climate neutrality by 2045, RZ ZamPart shall find complementary measures for or climate compensate in a credible way.

**) Compared to the base year 2011, as measured by the GHG protocol*
