

Quality policy (English version)

RZ ZamPart AB shall be a reliable supplier to all qualified engineering industries of cold-formed and machined products with the right quality.

The management shall ensure that the policy is implemented by making the requirements for our business and our products known internally. This applies to legal and customer requirements as well as requirements from stakeholders.

The management shall also ensure that the quality goals are established and that the resources needed to meet the goals are met. Keys in the quality work:

- Quality is everyone's concern, training and information about this shall be upheld continuously.
- Delivered products must always meet agreed requirements.
- There must be opportunities for continuous improvements at every stage.
- Documented rules and routines shall be in place.
- Cooperation and competence shall characterize our business.
